

The Shadows
"The Collection"
Mood Records MA 805
Disky NCD 648782
Released 2001 / 2002?

Disky presumably manufactured the item to the Japanese company Mood's specifications, since the disc has a "Japanese" look about it (though *THEME FROM THE DEER HUNTER*, which had only been issued in Japan on the *String Of Hits* Album but was mightily popular in Holland, looks very out of place). However, there is too much mono about to make this look like an authentic native product, and Disky foists yet another badly mauled implementation of *IN THE MOOD* on the world. The obi on this one is extra large, stretching right over the back cover, so masking the English track-listings and putting the Japanese equivalents on show. All in all, an eminently cobbled-together product.
